Kansas City, MO - South
Indicators of Low Healthy Food Access - 2014

availability

North
Healthy Food Access - 2014

* The death rate is from 2000, and includes the causes of death most related to access to healthy foods, adjusted for age due to the higher incidence of many diseases among older populations.

** U.S. Rule: PM

*** The USDA defines an urban food desert as a census tract in which at least 500 people and/or at least 33 percent of the census tract's population reside more than one mile from a supermarket or large grocery store.

Source: 2011 USDA Food Deserts, 2011 Grocery Store Locations, Trade Dimensions via TRF, 2000 Center for Disease Control Death Rate data via MHA America Regional Council.

BP conducts independent research that enables nonprofit organizations, foundations, and government agencies to make informed decisions about resource allocation and policy initiatives. Please see www.bpresearch.org for more information.

All Kansas City residents should be able to shop with dignity.

We want City Hall to support grocery store renovations and developments in our food deserts.

Will you help us refresh our neighborhood?

Todos los residentes de Kansas City deberían ser capaces de hacer compras con la dignidad.

Queremos que el Ayuntamiento apoye renovaciones de la tienda de comestibles y desarrollo en nuestros desiertos de la comida.

¿Nos ayudará a refrescar nuestra vecindad?

I support exploring grocery store renovation and development in our neighborhoods without access to fresh, affordable food through Fresh Food Financing Initiatives.

Yo apoyo explorar tienda renovación y desarrollo de nuestros barrios sin acceso a alimentos frescos y asequibles mediante alimentos frescos las iniciativas de financiación.
